ecowheels

NEW!

1 How I'm made... Wheat straw is the dry stalk that remains after wheat grains are harvested.

2 The wheat straw is collected, broken down into cellulose fibers and then combined with recyclable plastics to produce bio-plastic.

3 The bioplastic is then used to help create your Eco-Wheels toy!

Eco-Wheels can be fully recycled, which means less plastic going into landfill! Saving the planet, one play at a time!
