### **Important Notice:**

This report has been prepared for the purposes and use of the person named on the report. In order to ensure that you have sight of a current and up to date copy of the Home Report it is **essential** that you log onto www.onesurvey.org (free of charge) to download a copy personalised in your own name. This enables both Onesurvey and the Surveyor to verify that you have indeed had sight of the appropriate copy of the Home Report prior to your purchasing decision. This personalised report can then be presented to your legal and financial advisers to aid in the completion of your transaction. **Failure to obtain a personalised copy may prevent the surveyor having any legal liability to you as they will be unable to determine that you have relied on this report prior to making an offer to purchase.** 

Neither the whole, nor any part of this report may be included in any published document, circular or statement, nor published in any way without the consent of Onesurvey Ltd. Only the appointed Chartered Surveyor can utilise the information contained herein for the purposes of providing a transcription report for mortgage/loan purposes.

PART 1.

## SINGLE SURVEY

A report on the condition of the property, with categories being rated from 1 to 3.

## Single Survey

Date of Re- inspection	22/08/2025
Date of Original Inspection	28/06/2024
Prepared by	Alan Young, Assoc RICS Edwin Thompson - Surveyors

### SINGLE SURVEY TERMS AND CONDITIONS (WITH MVR)

#### **PART 1 - GENERAL**

#### 1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property. <sup>1</sup>

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

 $\square$ 

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

#### 1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

<sup>&</sup>lt;sup>1</sup> Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Codes of Conduct

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

To date, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

#### 1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller:
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

### 1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

### 1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report will be prepared from information contained in the Report and the generic Mortgage Valuation Report. 2

### 1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

#### 1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

#### 1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for

expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

### 1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

#### 1.10 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format.
- the "Market Value" is The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- a "prospective Purchaser" is anyone considering buying the Property.
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and

<sup>2</sup> Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Rules of Conduct.

- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

### **PART 2 - DESCRIPTION OF THE REPORT**

#### 2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

### 2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, *visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.* 

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

#### 2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not

significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- 2.3.1 <u>Category 3</u>: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2.3.2 <u>Category 2</u>: Repairs or replacement requiring future attention, but estimates are still advised.
- 2.3.3 Category 1: No immediate action or repair is needed.

**WARNING**: If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

### 2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

### 2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

### 2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

### 2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- \*There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- ➤ \*There are no particularly troublesome or unusual legal restrictions;
- \*There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property

### 1. INFORMATION AND SCOPE OF INSPECTION

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the Surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the Surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the Surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities will not be inspected or reported on.

Description	A purpose built flat over two floor levels within a three storey block of four
Description	self contained units.
Accommodation	First Floor:
	Entrance hall, living room, kitchen, bedroom, bathroom, storage cupboards.
	Second Floor:
	Landing, two bedrooms.
Gross internal floor area (m2)	Approximate gross internal floor area is 93 sqm.
Neighbourhood and location	The property is situated within the centre of Duns in a popular residential location. The property is an ex-local authority owned building with many of the properties on the street now within private ownership. Duns has a good range of facilities within walking distance of the property.
Age	Approximately 60 years old
Weather	The weather was dry and bright at the time of the inspection.
Chimney stacks	Visually inspected with the aid of binoculars where required.
	There are no chimney stacks pertaining to the subject property.
	The property has a fan assisted flue from the boiler which vents directly to the south gable of the building.

<u></u>	
Roofing including roof space	Sloping roofs were visually inspected with the aid of binoculars where required.
	Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3m ladder externally.
	Flat roofs have a limited life and depending on their age and quality of workmanship can fail at any time.
	Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property. If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so.
	The pitched roof surfaces are clad in interlocking concrete tiles over a timber trussed roof structure.
	There are two dormer protrusions with flat roofs. The front roof appears to have a fibreglass (GRP) finish and the rear has a felt finish.
	Access to the main roof void is through a hatch to the first floor landing. The undersides of the roof slopes have a fibreboard sarking. The roof void houses a presumed redundant water tank. This area appears suitably insulted with fiberglass wool insulation.
	Access to the rear eaves void is via small door to the first floor landing. This area appears suitably insulted with fiberglass wool insulation.
Rainwater fittings	Visually inspected with the aid of binoculars where required.
	Rainwater goods are of a PVC specification.
Main walls	Visually inspected with the aid of binoculars where required. Foundations and concealed parts were not exposed or inspected.
	The main walls are of a render faced cavity construction with a brick base course.
Windows, external doors and joinery	Internal and external doors were opened and closed where keys were available.
	Random windows were opened and closed where possible.
	Doors and windows were not forced open.
	The windows are of a replacement UPVC double glazed specification.
	The door is of a UPVC specification with glazed upper panel.
	Facias and soffits are predominantly of timber specification.
External decorations	Visually inspected.
	External timberwork and metalwork have painted finishes.
Conservatories / porches	Visually inspected.
	Not applicable.
i	T.

Communal areas	Circulation areas visually inspected.
	There are shared external concrete stairs to the front elevation and shared access flagstone pathway to the south of the building leading to the rear gardens.
Garages and permanent	Visually inspected.
outbuildings	There are no garages or permanent outbuildings pertaining the the subject property.
Outside areas and	Visually inspected.
boundaries	There are private garden grounds to the side and rear of the property. The side garden is predominantly laid to lawn with bedded borders. The rear garden is laid to hardstanding with patio area.
	The grounds are bounded by a combination of timber fencing and stone walls.
Ceilings	Visually inspected from floor level.
	Ceilings throughout comprise plasterboard with a combination of paper and emulsion finishes.
Internal walls	Visually inspected from floor level.
	Using a moisture meter, walls were randomly tested for dampness where considered appropriate.
	Internal walls are a combination of timber stud partition design, plaster boarded with paper and emulsion finishes and solid plaster with a combination of paper and emulsion finishes.
	External walls are a of solid plaster specification with paper and emulsion finishes.
Floors including sub floors	Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.
	Sub-floor areas were inspected only to the extent visible from a readily accessible and unfixed hatch by way of an inverted "head and shoulders" inspection at the access point.
	Physical access to the sub floor area may be taken if the Surveyor deems it is safe and reasonable to do so, and subject to a minimum clearance of 1m between the underside of floor joists and the solum as determined from the access hatch.
	Floors are of a suspended timber construction with boards laid on joists.
	No access was available any sub-floor areas at the time of inspection.

Internal joinery and kitchen fittings	Built-in cupboards were looked into but no stored items were moved.
	Kitchen units were visually inspected excluding appliances.
	Skirtings and architraves are of a painted timber specification.
	Internal doors are a combination of hollow core and glazed timber units.
	The kitchen has a range of base and wall units with laminate worktops.
	The staircase is of timber specification.
Chimney breasts and	Visually inspected. No testing of the flues or fittings was carried out.
fireplaces	There is an electric fireplace within the living room with timber surround and marble hearth.
Internal decorations	Visually inspected.
	A combination of paper and emulsion throughout.
Cellars	Visually inspected where there was safe and purpose-built access.
	There are no cellars pertaining to the subject property.
Electricity	Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances.
	Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the Surveyor will state that in the report and will not turn them on.
	Mains electricity is provided with the consumer unit and meter located within a cupboard to the first floor hallway.
Gas	Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances.
	Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the Surveyor will state that in the report and will not turn them on.
	Mains gas is provided with the meter located externally.

	·
Water, plumbing and bathroom fittings	Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.
	No tests whatsoever were carried out to the system or appliances.
	We cannot comment of the condition of the water supply pipe to the building. Plumbing where visible comprises copper, braided metal and PVC pipework.
	Sanitary fittings comprise a three piece suite to the first floor with a mains shower over the bath, WC and wash hand basin.
	There is an external tap.
	The stopcock appears to be located within the kitchen to the rear elevation and boxed in to the side of the radiator.
Heating and hot water	Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.
	No tests whatsoever were carried out to the system or appliances.
	A Worcester 29i junior condensing combi boiler located within a hallway cupboard and provides central heating by radiators together with instantaneous domestic hot water.
Drainage	Drainage covers etc were not lifted.
	Neither drains nor drainage systems were tested.
	The property is presumed to be connected to mains drainage.
Fire, smoke and burglar	Visually inspected.
alarms	No test whatsoever were carried out to any systems or appliances.
	There is now a requirement in place for compliant interlinked fire, smoke and heat detectors in residential properties. The new fire smoke and alarm standard came into force in Scotland in February 2022, requiring a smoke alarm to be installed in the room most frequently used for living purposes and in every circulation space on each floor. A heat alarm also requires to be installed in each kitchen. The alarms need to be ceiling mounted and interlinked. Where there is a carbon fuelled appliance such as a boiler, open fire or wood burner etc. a carbon monoxide detector is also required.
	The surveyor will only comment on the presence of a smoke detector etc. but will not test them, ascertain if they are in working order, interlinked and / or fully compliant with the fire and smoke alarm standard that was introduced in 2022.
	We have for the purposes of the report, assumed the system is fully compliant, if not then the appropriate compliant system will required to be installed prior to sale. This of course should be confirmed by your legal advisor.

### Any additional limits to inspection

Only the subject flat and internal communal areas giving access to the flat were inspected.

If the roof space or under-building / basement is communal, reasonable and safe access is not always possible. If no inspection was possible, this will be stated.

If no inspection was possible, the Surveyor will assume that there are no defects that will have a material effect on the valuation.

The building containing the flat, including any external communal areas, was visually inspected only to the extent that the Surveyor is able to give an opinion on the general condition and standard of maintenance.

An inspection for Japanese Knotweed was not carried out.

This is a plant which is subject to control regulation, is considered to be invasive and one which can render a property unsuitable for some mortgage lenders. It is therefore assumed that there is no Japanese Knotweed within the boundaries of the property or its neighbouring property.

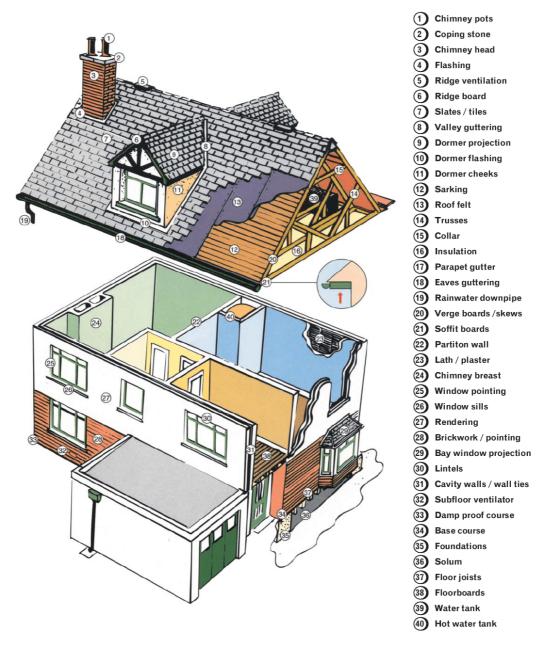

Identification of Japanese Knotweed is best undertaken by a specialist contractor. If it exists removal must be undertaken in a controlled manner by specialist contractors. This can prove to be expensive.

Please note that this report is a non-intrusive (visual) inspection. The Surveyor inspects the inside and outside of the main building and all permanent buildings, he does not force or open up the fabric. This means that the Surveyor does not take up carpets, floor coverings, move furniture, remove the contents of cupboards, roof spaces etc, remove secured panels and/or hatches or undo electrical fittings. The floor surfaces and underfloor spaces are examined insofar as they are accessible. It is not possible to assess the internal condition of any chimney, boiler or other flues. In some cases, furnishings may conceal defects.

Some areas of the chimneys and pitched roof surfaces were not fully or closely inspectable from ground level.

Timbers and plumbing to bathrooms and kitchens cannot be inspected or guaranteed and we assume these areas are defect free.

### Sectional Diagram showing elements of a typical house

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

### 2. CONDITION

This section identifies problems and tells you about the urgency of any repairs by using one of the above 3 categories:

Category 3	Category 2	Category 1
to other parts of the property or cause a safety	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Structural movemen	t
Repair category:	
Notes:	There was no evidence to suggest any significant structural movement within our visual inspection.

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Dampness, rot and infestation		
Repair category:	2	
Notes:	Tests were undertaken with a moisture meter at random points to internal walls surfaces. Whilst lined finishes can be beneficial in concealing dampness, they can also allow damp and rot to develop in concealed areas. The general condition of lined areas appears satisfactory. Tests were undertaken with a moisture meter at random points to internal wall surfaces.	
	As noted, the lined finishes would prevent the effective use of a moisture meter unless the lined wall did not have an effective damp membrane or cavity. Wall linings will not remove dampness itself but are intended to provide a cosmetic lining which should be unaffected by any dampness in the wall behind provided that the lining is protected by a cavity or physical membrane.	
	The readings obtained indicate that dampness is present to the side of the bath and the opposite side of this wall within the hallway to the side and rear of the radiator. This would appear to be caused by a leak to the shower cubicle. Some damp staining was noted to the hallways cupboard housing the boiler but no readings were obtained at the time of inspection.	
	It is recommended that a specialist contractor issuing a long term guarantee is instructed to carry out an inspection of the property and implement any necessary remedial work. In conjunction with this, any damp affected plaster will need to be replaced in accordance with the specifications of the specialist contractor. Failure to do so may nullify the validity of the guarantee.	
	Please note that a Level 2 Homebuyer survey is a non intrusive (visual) inspection.	

Chimney stacks	
Repair category:	
Notes:	Not applicable.

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Roofing including roof space	
Repair category:	2
Notes:	No significant sagging or deflection was noted in the scope of our ground level inspection. Some parts of the roof are not visible from a ground level, visual inspection.
	Some slight undulation was noted between the subject property and neighbouring flat. Sections of verge pointing was cracked and coming away in places. Replacement tiles were noted in places.

Rainwater fittings	
Repair category:	
Notes:	A degree of staining was noted to the PVC rainwater goods. The alignment of the guttering appeared satisfactory although it was dry at the time of inspection so this could not be fully tested.
	The rainwater goods should be thoroughly overhauled, flushed through and tested. Thereafter they should be prepared and redecorated when weather conditions permit. Gutters, gullies etc require regular cleaning to remove leaves, moss and other deposits and so prevent blockages.
	Outer boxing to the guttering has come away. This has no effect on the operation of the guttering but appears unsightly.

Main walls	
Repair category:	
Notes:	Within the limitations of our inspection no significant defects were noted.
	Some impact damage was noted to the render at the corners of the building, There are areas of poor render work and patching around external pipes and guttering. There is light cracking in places. These areas will likely require works in the future if left unattended.
	A programme of routine maintenance is recommended.

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Windows, external doors and joinery	
Repair category:	
Notes:	The windows have been replaced in recent years and appear to be in good working order. It is assumed that the windows comply with the correct local authority building regulations and that guarantees/ warranties are held.
	The door is not catching property when pushed closed and requires some adjustment. We noted no major issues here.

External decorations	
Repair category:	2
Notes:	External painted finishes generally appear in good order.
	Paint finishes to the external timbers are weathered and flaking in places.
	External metalwork is showing signs of blistering and previous rusting has been painted over. This is most evident to the balustrade.
	The timber facings above the rear dormer are soft and rotten and will require replacement in the near future.
	Ongoing maintenance will be required.

Conservatories / porches	
Repair category:	
Notes:	Not applicable.

Communal areas	
Repair category:	2
Notes:	Sections of the concrete stairs are fractured with exposed reinforcing metalwork. This area should be monitored.

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Garages and permanent outbuildings	
Repair category:	
Notes:	Not applicable.

Outside areas and boundaries	
Repair category:	1
Notes:	No significant defects were noted.
	Fences will require ongoing maintenance. The stone wall has vegetation growth which should be removed to avoid future damage to the wall.

Ceilings	
Repair category:	
Notes:	No significant issues were noted as part of our visual inspection.
	Blistering paper was noted to the first floor bedrooms. Decoration would be beneficial.
	Hairline cracking was noted in places. These areas will require filling prior to future decoration.

Internal walls	
Repair category:	1
Notes:	No significant issues were noted as part of our visual inspection.
	There is staining to the wall adjacent to the bathroom door within the hallway where damp readings were obtained. This areas will require redecoration after corrective works have been undertaken.
	Hairline cracking was noted in places. These areas will require filling prior to future decoration.
	The first floor cupboard has damaged paper surfaces. Decoration would be beneficial.

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Floors including sub-floors	
Repair category:	
Notes:	Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted. Inspection was not possible due to floor coverings and we therefore cannot comment on their condition.
	We did not note any significant issues as far as our inspection would allow. Some creaking floorboards were noted throughout. Some evidence of historic movement was noted thought off level sections of flooring. We found no evidence to suggest this was ongoing but we cannot guarantee this point.

Internal joinery and kitchen fittings	
Repair category:	
Notes:	No significant issues were noted as part of our visual inspection.
	Some light damage was noted to the lower parts of the kitchen units and kicker plates.
	Glazing to internal doors should be checked for safety glass.

Chimney breasts and fireplaces	
Repair category:	
Notes:	No applicable.

Internal decorations	
Repair category:	
Notes:	The property is in good decorative order.

Cellars	
Repair category:	
Notes:	Not applicable.

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Electricity	
Repair category:	
Notes:	The electrical installation appear of a modern pattern. Copies of electrical inspections and any relevant certification should be obtained and it ensured that works were carried out by a registered electrical specialist.
	Current recommendations are that domestic installations should be tested at least once every ten years (five yearly if let). The installation should be tested by a competent Select registered electrician and all recommendations implemented in order to secure a current certificate and comply with the current legislation.

Gas	
Repair category:	
Notes:	It should be ensured that rental properties comply with the Gas Safety (Installations and Use) Regulations 1998. Landlords must ensure that each appliance and the flue is in a safe condition and includes an annual gas safety certificate.
	Enquiries should be made to ensure that there is a current gas safety certificate in relation to the boiler. If not current available then one should be arranged.
	It is important that gas pipes and appliances are checked regularly. Any work carried out on gas pipework or a gas fired appliance must be conducted by either a suitably qualified Gas Safe registered engineer or Northern Gas Networks.

Water, plumbing and bathroom fittings	
Repair category:	2
Notes:	The systems have not been tested, however, within the scope of our visual inspection no significant defects were noted.
	Sealants to the kitchen and bathroom are perishing in places. Sealant around the edges of showers, baths, wcs and wash hand basins should be maintained intact to prevent the penetration of water and associated risks to adjacent timbers.
	We advise that you check the water pressure is suitable for your requirements.

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Heating and hot water					
Repair category:	1				
Notes:	No tests whatsoever were carried out to the system or appliances.				
	A Worcester 28i junior condensing combi boiler located in hallway cupboard provides central heating by radiators together with instantaneous domestic hot water.				
	The second floor bedrooms are not heated by the central heating system.				
	From our limited inspection of the hot water and central heating system there is no evidence to suggest any obvious defects. This would appear to be a relatively recent boiler. We would nevertheless recommend that the system is tested and overhauled prior to exchange of contracts and that a regular maintenance contract is placed with an approved heating				
	engineer.				

Drainage	
Repair category:	
Notes:	The property is presumed to be connected to mains drainage. Drainage covers were not lifted.
	Neither drains nor drainage systems were tested. We advise that precautionary checks of the drainage system are made.

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the comments above for detailed information.

Structural movement	1
Dampness, rot and infestation	2
Chimney stacks

Chimney breasts and fireplaces	
Internal decorations	1
Cellars	
Electricity	1
Gas	1
Water, plumbing and bathroom fittings	2
Heating and hot water	1
Drainage	1

### Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

### Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

### 3. ACCESSIBILITY INFORMATION

**Guidance Notes on Accessibility Information** 

<u>Three steps or fewer to a main entrance door of the property:</u> In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

<u>Unrestricted parking within 25 metres:</u> For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coinoperated machines.

1. Which floor(s) is the living accommodation on?	First and second
2. Are there three steps or fewer to a main entrance door of the property?	[ ]YES [x]NO
3. Is there a lift to the main entrance door of the property?	[ ]YES [x]NO
4. Are all door openings greater than 750mm?	[ ]YES [x]NO
5. Is there a toilet on the same level as the living room and kitchen?	[x]YES [ ]NO
6. Is there a toilet on the same level as a bedroom?	[x]YES [ ]NO
7. Are all rooms on the same level with no internal steps or stairs?	[ ]YES [x]NO
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	[x]YES [ ]NO

### 4. VALUATION AND CONVEYANCER ISSUES

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated re-instatement cost for insurance purposes.

### Matters for a solicitor or licensed conveyancer

Where items of maintenance or repair have been identified, the purchaser should satisfy themselves as to the costs and implications of these issues prior to making an offer to purchase.

We are unaware of any non-compliance with Town Planning requirements or adverse environmental factors. To our knowledge there are no development or road widening proposals that are likely to affect the property directly.

Roads and footpaths are made-up and adopted by the Local Authority. We would however recommend that you instruct your solicitor/conveyancers to make the usual searches in this regard. They should verify that all building regulation approvals and planning consents were obtained in relation to historic works undertaken to the property including the replacement windows and door.

Your legal adviser should give you further information in relation to your liability and rights in respect of the rights of access to the garden grounds.

The property is suitable for lending purposes subject to the individual lenders criteria.

Evidence of penetrating dampness was noted to the first floor hallway to the rear of the shower cubicle. We advise that a tradesperson is instructed to inspect and provide quotations.

### Estimated re-instatement cost (£) for insurance purposes

£325,000

(three hundred and twenty five thousand pounds)

### Valuation (£) and market comments

£125.000

(one hundred and twenty five thousand pounds)

# MORTGAGE VALUATION **REPORT**

Includes a market valuation of the property.

Mortgage Valuation Report					
Property:	11 Blinkbonny Gardens Duns		e Real Estate Ltd		
	TD11 3BG	Tenure: Freehold			
Date of Inspection:	22/08/2025	Reference:	SS/AY		

This report has been prepared as part of the seller's instructions to carry out a Single Survey on the property referred to above. The purpose of this report is to summarise the Single Survey for the purpose of advising a potential lender on the suitability of the property for mortgage purposes. The decision as to whether mortgage finance will be provided is entirely a matter for the lender. You should not rely on this report in making your decision to purchase but consider all the documents provided in the Home Report. Your attention is drawn to the additional comments elsewhere within the report which set out the extent and limitations of the service provided. This report should be read in conjunction with the Single Survey Terms and Conditions (with MVR). In accordance with RICS Valuation — Global Standards 2017 this report is for the use of the party to whom it is addressed or their named client or their nominated lender. No responsibility is accepted to any third party for the whole or any part of the reports contents. Neither the whole or any part of this report may be included in any document, circular or statement without prior approval in writing from the surveyor.

### 1.0 LOCATION

The property is situated with the centre of Duns in a popular residential location. The property is an ex-local authority owned building with many of the properties on the street now within private ownership. Duns has a good range of facilities within walking distance of the property.

A purpose built flat over two floor levels within a three storey block of four self contained units.

### 3.0 CONSTRUCTION

The main roof is of a pitched construction clad in tiles.

The main walls are of a render faced cavity construction.

### 4.0 ACCOMMODATION

First Floor:

Entrance hall, living room, kitchen, bedroom, bathroom, storage cupboards.

#### Second Floor:

Landing, two bedrooms.

5.0	SERVICES	SERVICES (No tests have been applied to any of the services)							
Water:	Mains	Electricity:	Electricity: Mains Gas: Mains Drainage: Mains						
Central He	eating:	: Gas Fired to 1st Floor Only							
6.0	OUTBUILD	TBUILDINGS							
Garage:		None							
Others:		None							

**GENERAL CONDITION** - A building survey has not been carried out, nor has any inspection been made of any woodwork, services or other parts of the property which were covered, unexposed or inaccessible. The report cannot therefore confirm that such parts of the property are free from defect. Failure to rectify defects, particularly involving water penetration may result in further and more serious defects arising. Where defects exist and where remedial work is necessary, prospective purchasers are advised to seek accurate estimates and costings from appropriate Contractors or Specialists before proceeding with the purchase. Generally we will not test or report on boundary walls, fences, outbuildings, radon gas or site contamination.

In our opinion, this property is, on the whole, is a reasonable proposition for purchase at the level of our valuation, provided that you are prepared to accept the cost and inconvenience of dealing with the various repair/improvement works reported herein. These deficiencies are relatively common in properties of this age and type.

8.0 ESSENTIAL REPAIR WORK (as a condition of any mortgage or, to preserve the condition of the property)

None.

#### 8.1 Retention recommended:

### 9.0 ROADS & FOOTPATHS

Roads and footpaths are made-up and adopted by the Local Authority.

### **Energy Performance Certificate (EPC)**

**Dwellings** 

### **Scotland**

### 11 BLINKBONNIE GARDENS, DUNS, TD11 3BG

**Dwelling type:** Top-floor flat Date of assessment: 28 June 2024 Date of certificate: 02 July 2024 **Total floor area:** 93 m<sup>2</sup>

**Primary Energy Indicator:** 215 kWh/m<sup>2</sup>/year

Reference number: 2081-1012-0206-8634-3200 RdSAP, existing dwelling Type of assessment:

Approved Organisation: **Elmhurst** 

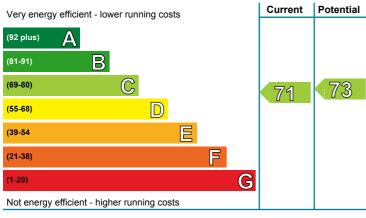

Main heating and fuel: Boiler and radiators, mains

#### You can use this document to:

- Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO<sub>2</sub> emissions by improving your home

Estimated energy costs for your home for 3 years*	recommendation report for more	
Over 3 years you could save*		

\* based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

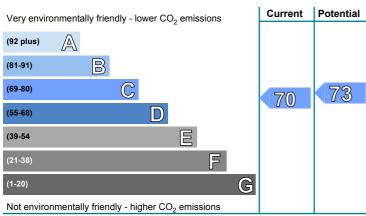

### **Energy Efficiency Rating**

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is band C (71). The average rating for EPCs in Scotland is band D (61).

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

### Environmental Impact (CO<sub>2</sub>) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO<sub>2</sub>) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is band C (70). The average rating for EPCs in Scotland is band D (59).

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

### Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Condensing boiler	£2,200 - £3,000	£315.00

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282

THIS PAGE IS THE ENERGY PERFORMANCE **CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS** REPLACED WITH AN UPDATED CERTIFICATE

### Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	Cavity wall, filled cavity	***	<b>★★★☆☆</b>
Roof	Pitched, 270 mm loft insulation	<b>★★★★</b> ☆	<b>★★★★</b> ☆
Floor	(another dwelling below)	_	_
Windows	Fully double glazed	****	<b>★★★★</b> ☆
Main heating	Boiler and radiators, mains gas	****	<b>★★★★</b> ☆
Main heating controls	Programmer, room thermostat and TRVs	****	<b>★★★★</b> ☆
Secondary heating	Room heaters, electric	_	_
Hot water	From main system	***	<b>★★★★</b> ☆
Lighting	Low energy lighting in all fixed outlets	****	****

## The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO<sub>2</sub> emissions, running costs and the savings possible from making improvements.

## The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 38 kg CO<sub>2</sub>/m<sup>2</sup>/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 3.5 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 0.3 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

### Estimated energy costs for this home

	Current energy costs	Potential energy costs	Potential future savings
Heating	£3,363 over 3 years	£3,123 over 3 years	
Hot water	£648 over 3 years	£570 over 3 years	You could
Lighting	£354 over 3 years	£354 over 3 years	save £318
Tota	als £4,365	£4,047	over 3 years

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

### **Recommendations for improvement**

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

December ded masses		lu dinativa nast	Typical saving	Rating after improvement		
Re	ecommended measures	Indicative cost	per year	Energy	Environment	
1	Replace boiler with new condensing boiler	£2,200 - £3,000	£105	C 73	C 73	

#### Alternative measures

There are alternative improvement measures which you could also consider for your home. It would be advisable to seek further advice and illustration of the benefits and costs of such measures.

Micro CHP

## Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to www.greenerscotland.org.

### About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

### 1 Condensing boiler

A condensing boiler is capable of much higher efficiencies than other types of boiler, meaning it will burn less fuel to heat this property. This improvement is most appropriate when the existing central heating boiler needs repair or replacement, however there may be exceptional circumstances making this impractical. Condensing boilers need a drain for the condensate which limits their location; remember this when considering remodelling the room containing the existing boiler even if the latter is to be retained for the time being (for example a kitchen makeover). Building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority building standards department and seek advice from a qualified heating engineer.

### Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

LZC energy sources present: There are none provided for this home

### Your home's heat demand

In this section, you can see how much energy you might need to heat your home and provide hot water. These are estimates showing how an average household uses energy. These estimates may not reflect your actual energy use, which could be higher or lower. You might spend more money on heating and hot water if your house is less energy efficient. The table below shows the potential benefit of having your loft and walls insulated. Visit https://energysavingtrust.org.uk/energy-at-home for more information.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation	
Space heating (kWh per year)	8,637	N/A	N/A	N/A	
Water heating (kWh per year)	2,201				

### **About this document**

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Assessor's name: Mr. Simon Sanderson

Assessor membership number: EES/009947

Company name/trading name: Edwin Thompson LLP Address: Edwin Thompson LLP 76 Overhaugh Street

Selkirkshire Galashiels TD1 1DP

Phone number: 01896 751300

Email address: f.wathen@edwin-thompson.co.uk

Related party disclosure: No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

#### Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

## Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit greeners cotland.org or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.

## PROPERTY QUESTIONNAIRE

The owner of the property is required to complete this document which asks for information on the property such as 'Which council tax band?' etc.

Property address	11 Blinkbonnie Gardens, Duns, TD11 3BG
Seller(s)	Revibe Real Estate Ltd - Bruce & Ross
	Aitchison
Г	
Completion date of property questionnaire	28/06/2024

### **Note for sellers**

- Please complete this form carefully. It is important that your answers are correct.
- The information in your answers will help ensure that the sale of your house goes smoothly. Please answer each question with as much detailed information as you can.
- If anything changes after you fill in this questionnaire but before the date of entry for the sale of your house, tell your solicitor or estate agent immediately.

## Information to be given to prospective buyer(s)

_		
1.	Length of ownership	
	How long have you owned the property? 10months	
2.	Council tax	
	Which Council Tax band is your property in? (Please tick one)  ☐ A ☐ B ☐ C ☐ D ☐ E ☐ F ☐ G ☐ H	
3.	Parking	
	What are the arrangements for parking at your property?  (Please tick all that apply)	
	• Garage	
	Allocated parking space	
	• Driveway	
	Shared parking	
	On street	
	Resident permit	
	Metered parking	
	Other (please specify):	
4.	Conservation area	
	Is your property in a designated Conservation Area (that is an area of special architectural or historical interest, the character or appearance of which it is desirable to preserve or enhance)?  ☐ Yes ☐ No ☐ Don't know	

5.	Listed buildings	
	Is your property a Listed Building, or contained within one (that is a building recognised and approved as being of special architectural or historical interest)?	☐ Yes ☑ No
6.	Alterations/additions/extensions	
a.	(i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)?  If you have answered yes, please describe below the changes which you have made:	☐ Yes ☑ No
	(ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work?	☐ Yes
	If you have answered yes, the relevant documents will be needed by the purchaser and you should give them to your solicitor as soon as possible for checking.	I INO
	If you do not have the documents yourself, please note below who has these documents and your solicitor or estate agent will arrange to obtain them:	
b.	Have you had replacement windows, doors, patio doors or double glazing installed in your property?	☐ Yes ☑ No
	If you have answered yes, please answer the three questions below:	□ Vaa
	(i) Were the replacements the same shape and type as the ones you replaced?	☐ Yes ☐ No
	(ii) Did this work involve any changes to the window or door openings?	☐ Yes ☐ No
